SECTION 1

How to Use the “By Time” Library

Choose the perfect pattern based on how much time you have

The By Time Library organizes every pattern by estimated completion time, so you always know what you can finish with the hours you have available.

Understanding Time Categories

Each pattern in the By Time Library falls into one of five tiers. These estimates assume an intermediate knitter working at a comfortable pace—about 20–30 stitches per minute for stockinette.

CATEGORY	TIME RANGE	TYPICAL PROJECTS	BEST FOR
Quick Wins	Under 2 hours	Coasters, bookmarks, small ornaments, headbands	Instant gratification, craft fair fillers, gift toppers
Evening Projects	2–5 hours	Dishcloths, baby hats, simple scarves, mug cozies	One-sitting projects, batch production for selling
Weekend Projects	5–15 hours	Beanies, cowls, mittens, baby blankets, market bags	Saturday–Sunday projects, craft fair inventory
Week-Long Projects	15–40 hours	Adult sweaters, shawls, throw blankets, cardigans	Dedicated project knitters, higher-ticket sales items
Epic Makes	40+ hours	Cabled afghans, intricate lace shawls, colorwork sweaters	Portfolio pieces, commissions, personal masterworks

Tips for Accurate Time Planning

KNOW YOUR SPEED

Time yourself knitting 20 rows of stockinette on US 8 needles. Multiply to estimate your personal pace. If you knit slower than average, add 20–30% to the listed times.

FACTOR IN COMPLEXITY

Colorwork adds about 30% more time. Cables add 20%. Lace with charts adds 40–50%. Simple texture patterns (seed stitch, moss stitch) add about 10%.

COUNT THE FINISHING

Seaming, weaving in ends, blocking, and adding buttons can add 1–3 hours to any project. Always budget finishing time separately.

BATCH SIMILAR STEPS

If making multiples for selling, knit all the pieces first, then do all the seaming, then all the finishing. Assembly-line style saves 15–20% of total time.

How to Pick Patterns Based on Available Time

The 80% Rule: Choose a pattern whose estimated time is about 80% of your available time. This leaves a comfortable buffer for frogging mistakes, taking breaks, and finishing details.

Follow this decision process:

- 1 Check your calendar.** How many knitting hours do you realistically have this week? Be honest—most people overestimate by 30%.
- 2 Pick the right tier.** Match your available hours to the time category table above.
- 3 Filter by purpose.** Are you knitting for yourself, as a gift, or to sell? This narrows your choices within the tier.
- 4 Check yarn requirements.** Make sure you have the right weight and yardage on hand before starting.
- 5 Start with the simplest pattern in that tier** if you are new to time-based planning. Build confidence, then tackle complex ones.

Example Project Timelines

SCENARIO	AVAILABLE TIME	RECOMMENDED CATEGORY	EXAMPLE PICK
Lunch-break knitting (5 days)	5 hours total	Evening Projects	Simple ribbed hat
Weekend at the cabin	10–12 hours	Weekend Projects	Cabled cowl or market bag
Gift needed in 2 weeks	14+ hours	Weekend Projects	Baby blanket or fingerless mitts set
Craft fair in 4 weeks	40+ hours	Mix of Quick Wins + Evenings	Batch of 20 dishcloths + 10 headbands

SCENARIO	AVAILABLE TIME	RECOMMENDED CATEGORY	EXAMPLE PICK
Personal challenge project	Unlimited	Epic Makes	Colorwork yoke sweater

Pro Tip: Keep a “time log” for your first 3–5 projects from this library. After that, you will know your personal speed multiplier and can plan with precision.

Time-to-Yarn Quick Reference

YARN WEIGHT	NEEDLE SIZE	STITCHES/INCH	APPROX. ROWS/HOUR	SPEED RATING
Bulky / 5	US 10–11	3–3.5	25–35	Fastest
Worsted / 4	US 7–8	4–5	18–25	Fast
DK / 3	US 5–6	5–6	14–20	Medium
Sport / 2	US 3–5	6–7	10–16	Slower
Fingering / 1	US 1–3	7–8	8–12	Slowest

Don’t Rush It: Speed comes with practice, not force. Trying to knit faster than your natural rhythm leads to uneven tension, sore hands, and more mistakes—which actually takes more time. Trust the process and let your pace increase naturally.

SECTION 2

How to Use the “To Sell” Library

Patterns selected specifically for profitability and market demand

Every pattern in the To Sell Library was chosen because it has a proven track record at craft fairs, on Etsy, and at local markets. This section shows you how to price, position, and profit from each one.

The Pricing Formula

Use this formula for every item you sell. Never price below it.

Selling Price = (Materials Cost × 3) + (Hours × Your Hourly Rate)

Your hourly rate should be at least \$12–15/hour for hand-knit items. Experienced knitters with a following can charge \$20–30/hour.

Profit Margin Calculator

ITEM	MATERIALS	TIME (HRS)	LABOR @ \$15/HR	TOTAL COST	SUGGESTED PRICE	PROFIT
Cotton dishcloth	\$2.50	1.5	\$22.50	\$30.00	\$12–15	See note*
Wool beanie	\$6.00	3	\$45.00	\$63.00	\$28–35	\$10–17
Cabled cowl	\$12.00	6	\$90.00	\$126.00	\$45–55	\$9–19
Baby blanket	\$15.00	12	\$180.00	\$225.00	\$65–85	\$20–40
Fingerless mitts (pair)	\$5.00	4	\$60.00	\$75.00	\$25–32	\$5–12
Market bag	\$8.00	5	\$75.00	\$99.00	\$30–40	\$6–16

**Dishcloths are typically priced below full formula value because they are high-volume, low-price items. Sell them in sets of 3 for \$35–40 to improve margins.*

Bestseller Categories by Price Point

UNDER \$15 — IMPULSE BUYS

- Dishcloths (sets of 3)
- Coasters (sets of 4)
- Bookmarks
- Scrunchies
- Mug cozies

High volume, low effort

\$15–\$35 — SWEET SPOT

- Beanies and hats
- Headbands and ear warmers
- Fingerless mitts
- Baby hats and booties
- Simple scarves

Best profit-to-time ratio

\$35–\$65 — MID-RANGE

- Cowls and infinity scarves
- Market bags
- Shawlettes
- Baby blankets (small)
- Mittens sets

Steady sellers year-round

\$65+ — STATEMENT PIECES

- Full shawls
- Throw blankets
- Sweaters (custom order)
- Cabled afghans
- Lace table runners

Fewer sales, higher margin

Display and Packaging Tips

- 1 Invest in labels.** A simple fabric or card-stock label with your brand name elevates perceived value by 30–40%. Include fiber content and care instructions.
- 2 Use kraft paper and twine** for wrapping. It photographs well, feels premium, and costs pennies per item.
- 3 Bundle related items.** A beanie + mitts set sells for more than both items individually. Mark the bundle price as a “save” compared to buying separately.
- 4 Always have one display-only sample** that customers can touch. People buy what they can feel.
- 5 Photograph everything before selling.** Even if you sell in person, you want photos for social media and potential online listings later.

Common Mistake: Pricing too low because “it only took me 2 hours.” Your skill took years to develop. Price for the value of the finished object, not just the time. If a customer can’t find a comparable handmade item for less, your price is fair.

What Sells and What Doesn’t

SELLS WELL	WHY	SELLS POORLY	WHY
Beanies	Universal sizing, seasonal demand	Adult sweaters	Sizing issues, too expensive for impulse
Baby items	Gift market, emotional buying	Doilies	Perceived as old-fashioned
Dishcloths	Practical, repeat buyers	Amigurumi (large)	Time-intensive, niche appeal
Scarves/cowls	One-size, visible gift	Socks	Sizing, competition from commercial
Market bags	Eco trend, practical	Placemats	Low perceived value vs. store-bought

Building Your Inventory Strategy

A balanced selling inventory follows the **50/30/20 rule**:

50% — BREAD AND BUTTER

Your proven bestsellers. Items you can make quickly and reliably. These pay the booth fee and keep revenue flowing. Restock these first.

30% — MID-RANGE SHOWPIECES

Items that catch the eye and pull people into your booth. Cowls on a mannequin, a beautiful shawl draped over a chair. These have solid margins.

20% — Statement Pieces: One or two high-end items that show the full range of your skill. They may not sell at every fair, but they establish you as a serious artisan and justify your pricing on everything else.

SECTION 3

How to Use the “Trending” Library

Stay current with what knitters and buyers want right now

The Trending Library captures patterns that are gaining momentum on social media, at craft shows, and in the knitting community. Use it to stay ahead of demand and knit what people are actually searching for.

How Trends Are Identified

A knitting trend becomes “trending” when it shows up in at least three of these signals:

SOCIAL MEDIA SIGNALS

- Hashtag volume on Instagram increasing week over week
- Multiple TikTok videos with 100K+ views featuring the technique or item
- Pinterest saves spiking for a pattern type
- YouTube tutorials appearing from multiple creators

MARKET SIGNALS

- Etsy search volume rising for specific terms
- Ravelry pattern downloads spiking
- Yarn shops reporting increased demand for specific weights or fibers
- Fashion runway influence trickling down to handmade

Seasonal Trends Calendar

SEASON	TRENDING ITEMS	TRENDING TECHNIQUES	HOT COLORS
Winter (Dec–Feb)	Chunky beanies, cable-knit cowls, thick mittens, hot water bottle covers	Bulky cables, brioche, double knitting	Cream, burgundy, forest green, charcoal
Spring (Mar–May)	Light shawls, cotton market bags, plant hangers, baby items (shower season)	Lace, openwork, cotton/linen blends	Pastels, sage, lavender, butter yellow
Summer (Jun–Aug)	Crop tops, beach bags, sun hats, sandal soles, lightweight tanks	Mesh/net stitches, color blocking, i-cord edges	Bright coral, turquoise, white, natural
Fall (Sep–Nov)	Pumpkin items, Fair Isle hats, fingerless mitts, chunky scarves, ornaments	Colorwork, texture patterns, provisional cast-on	Rust, mustard, olive, burnt orange, plum

How to Track Trends Yourself

- 1 Set up a weekly check-in.** Spend 15 minutes each Monday scanning Instagram “#knitting” and “#knittersofinstagram” for recurring themes.
- 2 Follow 5–10 knitting influencers** who focus on modern, trendy designs (not just traditional patterns).
- 3 Check Etsy’s trending searches** monthly. Go to the Etsy seller dashboard or search “knitting” and sort by “Most Recent” to see what new sellers are listing.
- 4 Watch for crossover trends.** When a knitted item appears in mainstream fashion (a celebrity wearing a chunky cardigan, a TV character in a hand-knit hat), demand spikes within 2–4 weeks.
- 5 Track your own bestsellers.** Your personal sales data is the most reliable trend indicator you have. What sold out fastest last season?

Adapting Trending Patterns to Your Style

The 70/30 Rule: Keep 70% of the trending pattern intact (the silhouette, the key technique, the general look) and put your personal spin on 30% (color choices, edge details, yarn substitution). This way your version is recognizably “on trend” but uniquely yours.

COLOR SWAPS

The easiest adaptation. Take a trending pattern and knit it in your signature color palette. This alone makes it feel original.

YARN UPGRADES

Substitute a luxury fiber (alpaca, merino, silk blend) for the standard yarn. Charge more and differentiate from mass-market versions.

SIZE VARIATIONS

If everyone is making adult versions, offer a matching kids/baby version. Or scale a popular hat pattern into a cowl.

TECHNIQUE MASH-UPS

Combine the trending silhouette with a different stitch pattern. A trending balaclava in brioche instead of stockinette stands out.

Timing Matters: Jump on a trend within 2–6 weeks of spotting it. By 3 months, the market is saturated. Have 2–3 samples ready before listing. Late entry means competing on price, which erodes your margins.

Trend Lifecycle: When to Enter and Exit

STAGE	DURATION	WHAT TO DO	RISK LEVEL
Emerging	Weeks 1–4	Make 2–3 samples, test pricing, photograph and list	Low (first mover advantage)
Growing	Weeks 4–10	Ramp up production, stock craft fairs, run Etsy ads	Low–Medium
Peak	Weeks 10–16	Sell through existing stock, stop making more, start discounting	Medium (competition is high)
Declining	Weeks 16+	Clearance remaining stock, move on to next trend	High (price pressure)

SECTION 4

Seasonal Planning Calendar

Month-by-month guide to knitting, selling, and preparing

Successful knitter-sellers plan 2–3 months ahead. This calendar tells you what to knit, when to list it, and which deadlines matter.

January & February

TASK	DETAILS	DEADLINE
Clearance winter stock	Discount remaining holiday items 30–40%	Jan 15
Valentine's Day items	Heart-themed dishcloths, red/pink scarves, baby items for expectant couples	Feb 1 (list by)
Spring inventory planning	Order cotton/linen yarn for spring items. Plan 15–20 pieces.	Feb 15
Skill building	Slow sales month: learn a new technique for spring items	Ongoing

March & April

TASK	DETAILS	DEADLINE
Easter/spring items	Pastel baby items, bunny toys, egg cozies, spring wreaths	Mar 15 (list by)
Mother's Day prep	Shawls, luxury scarves, spa washcloth sets with packaging	Apr 20 (list by)
Craft fair applications	Apply for summer/fall craft fairs NOW. Best fairs fill months early.	Apr 30
Photography refresh	New product photos with spring lighting and backgrounds	Mar–Apr

May & June

TASK	DETAILS	DEADLINE
Summer items launch	Market bags, sun hats, cotton tops, sandal soles	May 1
Father's Day	Scarves in masculine colors, hat/glove sets, beer/can cozies	Jun 1 (list by)
Begin fall production	Start knitting fall/winter inventory: hats, cowls, mittens	Jun 15 (begin)

TASK	DETAILS	DEADLINE
Graduation gifts	College-color scarves, blankets in school colors	May 15
July & August		
TASK	DETAILS	DEADLINE
Fall inventory production	Build stock: goal 30–50 items for fall/holiday season	Ongoing
Back-to-school	Backpack charms, teacher gift sets, college dorm items	Aug 1
Craft fair prep	Confirm booth details, order display materials, print price tags	Aug 15
Etsy SEO refresh	Update all listings with fall keywords and new photos	Aug 20
September & October		
TASK	DETAILS	DEADLINE
Fall launch	List all fall/winter items. Promote on social media.	Sep 1
Halloween items	Orange/black items, costume accessories, spooky ornaments	Oct 1 (list by)
Holiday production begins	Ornaments, stockings, gift items. Aim for 50+ items by Nov.	Sep 15 (begin)
Craft fairs	Peak craft fair season begins. Execute your booth plan.	As scheduled
November & December		
TASK	DETAILS	DEADLINE
Holiday rush	All holiday items listed and promoted. Gift guides, bundles, sets.	Nov 1
Shipping cutoff	Set and communicate last order dates for holiday delivery	Dec 10–15
Gift certificates	Offer custom order gift certificates for late shoppers	Dec 15–24
Year review	Track total sales, best sellers, profit margins. Plan next year.	Dec 28–31

Seasonal Color Palette Reference

SPRING/SUMMER PALETTE

Pastels (blush, mint, butter), bright coral, turquoise, white, natural linen, sky blue, lavender, peach. Light, airy, optimistic.

FALL/WINTER PALETTE

Burgundy, forest green, mustard, rust, charcoal, cream, navy, plum, burnt orange, oatmeal, cranberry. Rich, warm, cozy.

The 2-Month Rule: Always be knitting items for 2 months from now. In July, knit for September. In October, knit for December. This keeps you ahead of demand and prevents last-minute rush knitting.

Holiday Gift Knitting Timeline

- ☐ September: List all gift recipients and choose a pattern for each
- ☐ October 1: Start knitting. Tackle the longest projects first.
- ☐ November 1: All large projects should be underway. Start small gifts.
- ☐ November 15: Finish all items that need blocking or assembly
- ☐ December 1: Wrap and label all finished gifts
- ☐ December 10: Emergency quick-knit list for anyone you forgot
- ☐ December 15: Last shipping date for mailed gifts
- ☐ December 20: Finish any last-minute items (Quick Wins tier only)

SECTION 5

Craft Fair Checklist

Everything you need for a successful booth, from setup to follow-up

A well-prepared booth sells 2–3 times more than a disorganized one. Use this checklist every time you set up at a craft fair.

Before the Fair (1–2 Weeks Out)

- ☐ Confirm booth location, size, and setup time with organizer
- ☐ Count and photograph all inventory (for insurance and tracking)
- ☐ Price every item with a visible tag (include fiber and care info)
- ☐ Print a price list poster or banner for the back of your booth
- ☐ Prepare at least 20% more inventory than you expect to sell
- ☐ Test your payment system (card reader charged, app updated, Wi-Fi backup plan)
- ☐ Pack business cards or small flyers with your online shop info
- ☐ Plan your table layout on paper first
- ☐ Check weather forecast if the fair is outdoors
- ☐ Prepare a cash float: at least \$50 in small bills and coins

Booth Setup Essentials

- ☐ Tablecloth in a neutral color (white, cream, or natural linen)
- ☐ Risers or display stands to create height variation (wooden crates work well)
- ☐ Mannequin head or bust for hats, scarves, and cowls
- ☐ Basket or bin for small impulse items near the front edge
- ☐ Banner or sign with your brand name (readable from 10 feet away)
- ☐ Price signs for each item group (large, clear font)
- ☐ Mirror so customers can try on wearables
- ☐ Good lighting if indoors (clip-on LED light or string lights)
- ☐ Bags or tissue paper for wrapping purchases
- ☐ A small sign saying “Handmade with [fiber type]” for each item group

Day-Of Packing List

SALES SUPPLIES

- Card reader (charged)
- Phone (charged, with payment app)
- Cash box with float
- Receipt book or digital receipts
- Bags, tissue paper
- Business cards
- Notebook for custom orders
- Inventory list with check-off column

COMFORT & BACKUP

- Water bottle and snacks
- Portable phone charger
- Sunscreen/hat (outdoor fairs)
- Folding chair
- Extra price tags and markers
- Safety pins, clips, tape
- A current knitting project (shows your craft live)
- Tablecloth clips for wind

Payment Methods

METHOD	PROS	CONS	RECOMMENDED?
Cash	No fees, instant	Need change, theft risk	Always accept

METHOD	PROS	CONS	RECOMMENDED?
Square / Stripe Reader	Professional, easy	2.6%+ fee, needs signal	Essential
Venmo / PayPal	No hardware needed	Fees, not everyone has it	Good backup
Checks	No fees	Bounce risk	Avoid

Booth Layout Strategy

- 1 Height is everything.** Use risers, crates, and stands to create 3 levels. A flat table is invisible from 10 feet away. Eye-level items sell 40% more.
- 2 Put impulse items at the front edge.** Small, affordable items (under \$15) at arm's reach pull people in. Once they stop, they browse everything.
- 3 Group by category, not by color.** Shoppers think "I need a hat" not "I need something blue." Keep all hats together, all scarves together.
- 4 Leave breathing room.** A crowded table looks cheap. Give each item space. Less inventory on display (with backup stock underneath) looks more curated.
- 5 Anchor with a showpiece.** Place your most impressive item at eye level in the center-back. It draws attention and signals quality for everything else.

Inventory Tracking

Simple Tracking Method: Print a list of all items with quantities. Each time you sell one, make a tick mark. At the end of the day, count remaining stock and compare. This tells you what sold, your bestsellers, and total revenue.

After the Fair

- ☐ Count remaining inventory and note what sold out first
- ☐ Calculate total revenue and profit (subtract booth fee, materials, travel)
- ☐ Note which items got the most attention but did not sell (price issue? display issue?)
- ☐ Photograph your booth setup so you can replicate or improve it
- ☐ Follow up on any custom orders within 48 hours
- ☐ Post a thank-you photo on social media tagging the fair
- ☐ Restock bestsellers immediately while the fair is fresh in memory
- ☐ Write down 3 things to improve for next time

SECTION 6

Etsy Listing Tips

How to list your knitted items so they actually get found and sold

Etsy is the largest marketplace for handmade goods. These steps will help your knitted items rank higher in search and convert browsers into buyers.

Photography

- 1 Use natural light.** Photograph near a large window during the day. No flash, no overhead fluorescents. Cloudy days give the softest, most even light.
- 2 Show scale.** Include at least one photo of the item being worn, held, or placed next to a common object. Buyers need to understand size.
- 3 Use a clean background.** White, light wood, or a simple fabric backdrop. Avoid clutter. The item should be the star.
- 4 Capture texture.** Take one close-up shot that shows the stitch pattern, the drape, and the quality of the yarn. This is what separates handmade from factory.
- 5 Show all colors.** If you offer an item in multiple colors, photograph each one. Do not rely on digital mockups.
- 6 Include a lifestyle shot.** The item in use: a scarf draped on a coat hook, a beanie on a person walking, a dishcloth in a kitchen. This helps buyers imagine owning it.
- 7 Aim for 7–10 photos per listing.** Etsy gives you 10 slots. Use them all. More photos = higher conversion.

Phone Camera Tip: A modern smartphone in portrait mode with natural window light produces photos good enough for Etsy. You do not need a DSLR.

Title and Tag Optimization

Etsy's search algorithm matches buyer queries to your titles and tags. Here is how to write them:

TITLE FORMULA

[Material] [Item Type] [Key Feature] [Use Case / Gift Occasion]

Example: “Merino Wool Beanie Cable Knit Winter Hat Women’s Gift”

Use all 140 characters. Front-load the most important keywords. Do not stuff with commas or slashes.

TAG STRATEGY

Use all 13 tags. Each tag can be a multi-word phrase (up to 20 characters). Mix specific and broad:

- cable knit beanie
- merino wool hat
- winter gift for her
- handmade beanie
- chunky knit hat

Description Template

Use this structure for every listing:

Paragraph 1: What the item is + what makes it special (handmade, fiber quality, unique design).

Paragraph 2: Details — dimensions, weight, color options, care instructions.

Paragraph 3: Who it is for — gift ideas, occasions, use cases.

Paragraph 4: Shipping and turnaround time. Set expectations clearly.

Last line: “Each item is hand-knit to order. Please allow [X] days for production.”

Pricing on Etsy

COST COMPONENT	HOW TO CALCULATE	EXAMPLE (BEANIE)
Materials	Yarn used + extras (labels, packaging)	\$7.00
Labor	Hours × your rate (\$15–20/hr)	\$45.00 (3 hrs)
Etsy fees	\$0.20 listing + 6.5% transaction + 3% payment processing	~\$3.50
Shipping materials	Box/mailer + tissue + label	\$2.00
Minimum Price	Sum of above	\$57.50
Listed Price	Minimum or market rate (whichever is realistic)	\$32–38*

**Market pricing often falls below full formula value for common items. Research competing listings and price competitively while maintaining at least your materials + fees as the absolute floor.*

Shipping Tips

- 1 Offer free shipping if possible.** Etsy's algorithm favors listings with free shipping. Build shipping cost into your price.
- 2 Use poly mailers for soft items.** They are lighter than boxes, reducing postage costs. A beanie in a poly mailer ships for \$4–5 within the US.
- 3 Ship within 1–3 business days** of the order for ready-made items. For made-to-order, clearly state 7–14 days production time.
- 4 Always add tracking.** It protects both you and the buyer, and Etsy counts on-time shipping with tracking in your seller score.
- 5 International shipping:** Start with domestic only. Add international once you have steady sales and understand customs forms.

Etsy SEO Changes Regularly: What works today may shift in 6 months. Check Etsy's Seller Handbook quarterly for algorithm updates. Focus on great photos and genuine keywords rather than trying to game the system.

Quick Wins for New Sellers

START WITH 10–15 LISTINGS

Etsy rewards active shops. List at least 10 items to look established. Renew or add a new listing each week to stay fresh in search.

REQUEST REVIEWS

After delivery, include a small card thanking the buyer and gently asking for a review. Reviews are the single biggest trust signal on Etsy.

RESPOND FAST

Reply to messages within 24 hours. Etsy tracks your response time and displays it on your shop. Fast responses close more sales.

USE ETSY ADS SPARINGLY

Start with \$1–3/day on your top 3 listings. Track which ones convert. Turn off ads on items that get clicks but no sales.

Common Listing Mistakes to Avoid

MISTAKE	WHY IT HURTS	FIX
Dark or blurry photos	Buyers scroll past instantly	Natural light, clean background, steady hand or tripod
Vague title	Etsy search cannot match you to buyers	Use the title formula: material + item + feature + use
No care instructions	Buyers worry about ruining the item	Add washing/drying instructions in the description
Only 1–2 photos	Less trust, lower conversion	Use all 10 photo slots with varied angles
Ignoring reviews	Missed chance to build loyalty	Thank every reviewer, address any concerns publicly
Pricing too low	Signals low quality, burns you out	Research competitors, factor in ALL costs

Next Step

You now have a complete roadmap for using the By Time, To Sell, and Trending libraries. Open each library, pick one pattern from each, and start with the one that matches your schedule this week. The best way to learn the system is to use it—your first three projects will teach you more than re-reading this guide ever could.

Knit with intention. Sell with confidence. Stay on trend.
